Amarbir Singh

Senior Technologist @ Infosys Limited | Cloud and DevOps Architect | Full Stack Developer
+1 437 982 5618 | amarbir1800@gmail.com | LinkedIn | GitHub
JavaScript | TypeScript | C# | Python

PROFESSIONAL SUMMARY

Cloud & DevSecOps Architect with 15 years at Infosys, specializing in multi-cloud infrastructure, CI/CD automation, and full stack development. Active open-source maintainer for CNCF-ecosystem projects jHipster and Kyverno — a rare differentiator at the architect level. Proven track record of leading cross-functional teams, reducing deployment cycles by 20%, automating 85% of regression testing, and mentoring 15+ engineers to full DevOps adoption. Skilled in Azure, Kubernetes, GitHub Actions, and modern application frameworks across JavaScript, TypeScript, C#, and Python.

EXPERIENCE

Infosys Limited | Feb 2011 to Present

Senior Technologist (Azure Cloud/DevOps Architect) | Mississauga, Canada | Apr 2022 to Present

- **Reduced deployment cycles by 20%** for a Tier-1 education student information system by architecting cloud-native CI/CD pipelines and Bicep-driven IaC.
- **Mentored 15+ engineers** in modern Cloud, Application Design and DevOps practices, resulting in 100% adoption of automated infrastructure workflows across 4+ teams.
- **Increased operational efficiency** by implementing a standardized .NET Core architecture that supported cross-functional scaling and continuous delivery.

Technologies: Azure DevOps, IaC using Bicep, .NET Core, Git, Azure, AWS.

Specialist Programmer (Full Stack / DevOps Lead) | Chandigarh, India | Oct 2019 to Apr 2022

- **Platform Engineering**: Architected the Infosys in-house platform, enabling **15-minute** rapid deployment of production-ready web applications across Azure, AWS, and On-Prem environments.
- **Enabled seamless multi-cloud deployment** for the iLEAD platform as measured by 99.9% system availability through the implementation of Kubernetes, Docker, and OpenShift strategies.
- **Architected** a Shift-Left security framework by integrating **DevSecOps** pipelines into **CloudBees Jenkins** and **Azure DevOps**, standardizing automated security gates across all development workstreams.
- **Engineered** reusable full-stack templates using **Angular, React, and VueJS** integrated with **NodeJS** (NestJS) and **Spring Boot**, supporting accelerating new application scaffolding from days to hours.
- **Engineered** containerized solutions for diverse technology stacks (**Dotnetcore, NodeJS, Spring boot** etc.), improving resource utilization and portability across **IIS** and **cloud-native** clusters.

Technologies: jHipster, Kubernetes, Docker, Jenkins CI/CD, React/Vue.js, Node.js, OpenShift/Rancher.

QA/Automation Lead/SDET | Irvine, US and Chandigarh, India | Feb 2011 to Sep 2019

- Achieved **40% enhancement** in test coverage for high-stakes financial applications by leading the **design** of automated report comparison tools and VBA-based frameworks.
- Automated **85% of regression** testing for equity trading platforms by designing custom testing frameworks and implementing **RPA** solutions using **Blue Prism**.
- Established **code review** standards in **Bitbucket** and modular automation libraries for **60+** applications, improving maintainability and **decreasing script failure by 20%.**
- Coordinated **global delivery** across US and Indian hubs, ensuring zero-defect releases for a major financial services client.

Technologies: Test Automation, VBA Development, SQL, Framework Design, Custom Testing Framework, Blue Prism RPA, Financial Systems.

RECENT PROJECTS

Infrastructure as Code (IaC) Automation

- **Designed reusable enterprise** IaC modules using Azure Bicep, scaling a defense-focused automation strategy across multiple global teams and cutting provisioning time significantly**.**
- **Implemented GitOps practices** for infrastructure management, improving deployment consistency and audit compliance across distributed teams.
- **Published technical papers** on IaC principles, establishing best practices adopted across the engineering department.

Technologies: Azure, Bicep, ARM Templates, PowerShell, Azure DevOps.

Cloud Migration and Modernization Lead

- **Architected zero-downtime migration** of a mission-critical student information system (Tier-1, 100,000+ users) to Azure, achieving 25% faster deployment lead times**.**
- **Pioneered modern DevOps practices** in collaboration with cross-functional teams, driving measurable improvements in system reliability and release velocity**.**

Technologies: Azure, DevOps, CI/CD, Infrastructure as Code, Automation.

jHipster Dotnetcore Maintainer

- Collaborated with the JHipster dotnetcore community as an active contributor and maintainer.
- Contributed to fix various bugs, new features (terraform scripts), and documentation.

Technologies: Ejs, Node.js, Dotnetcore, TypeScript, IaC, Terraform.

SKILLS

- **DevOps/Cloud:** GitHub Actions, CI/CD, GitOps, GitHub Flow, Containers, Kubernetes, Infrastructure as Code, Cloud Platforms, DevSecOps, SRE, Automation.
- **Development:** JavaScript/TypeScript, Python, Node.js, React, API Design, System Design, TDD, Open Source.
- **Tools/Platforms:** Git, GitHub, VS Code/VS, Jenkins, Azure DevOps, Jira, Confluence, OpenShift, Rancher, PowerShell, Bash.
- **Soft skills**: Mentorship, Collaboration with stakeholders, Direct communication.

CERTIFICATIONS

- Certified Kyverno Associate (CKA) - CNCF
- GitOps Certified Associate (CGOA) - CNCF
- Microsoft Azure Administrator Associate (AZ-104) - Microsoft
- Microsoft Azure AI Engineer Associate (A1-102) - Microsoft
- Microsoft DevOps Solutions (AZ-400) - Microsoft
- Associate Cloud Engineer - Google
- AWS Cloud Practitioner - Amazon
- Machine Learning Foundations - eCornell
